Thus filly Man is subject unto forrow?

Though not to night, before it cores to morrow?

Yet carelessie he lives, sleeps, eats, and drinkes.

And never, rightly, on his Maker thinkes.

Then to know on which day the effects begine to manifest themselves, If from the day of the Eclipse 272 dayes be numbred, it poynterh out the 20 of Officher following, on which day the effects begine to manifest themselves. But Origanus, part 3 de affectibus cap. 2. Confentaneum namque eft Eclipfes ftatim operaris effettus suos aliquosque extendere. The effects of this Ectipse will continue fo many Moneths as houres eclipfed, that is, three Moneths. The Lord of this Ecliple is W Inpiter; and with him partner & Mars, the figne eclipfed is & Leo. Therefore according to Inntinus fol. 309 de Eclipsibus,. Eclipses of the Luminaries in the fyrie Triplicitie, Menaceth the deltruction of Herds, of Oxen and Sheep; the Exile, Imprisonment, or Murther of a great King or Prince. Among the common people of potentates, hatred, mutuall grudges, dissentions, the motion of a great Army, sharp War, slaughter of men; house-burnings, Thists, Rapes, depopulations, Abortive births, sharp Feavers, pestilent diseafes, scarcity of fruit and Corn, especially in these Regions that are subject the figne eclipfed, which are neither Great Brittane Ireland; and therfore these effects will not fall in them The degrees eclipsed is the 12 of a Lead Signifying the journey of fome King, or great Ma tions of things.

### A brief description of the four Quarters of the Year, 1665.

\*\*\*\*

The Spring this year beginneth upon the 9 of March, at 11 hours 50 min. in the afternoon, the Sun then entering into  $\gamma$  Aries making the dayes and nights of equal length throughout the World.

with him 4 Inpiter. In this Quarter, for the most part the Windes will fall out Easterly, South-East, Southerly

Of Summer.

Summer Quarter beginneth when the Sun encorrect into the first minute of the Tropicall Signe of Cancer, which hapneth the 11 of Sune; at 2 hours 42 min. in the morning, when the days are at the longest.

with him & Saturn. In this Quarter for the most part the Windes will fall out Northerly, North-West Westerly

Of Harvest.

Urumne, or Harvest Quarter begineth when the Sun entereth the equinoctial signe a Liwhich hapneth this Year on the 12 of Sepwhich time the day examinations are equals.

The Lord of this Quarter and Mari, and parties with him the O San: In this Quarter for the most partithe Windes will fall out Easterlie.

Of Winter.

Variet Quarter begineth the It day of December 5 hours 30 min. in the morning, at which time, the Sun entereth into the first minute of the Tropicall signe of Capricorne, making the shortest day and longest night in the year, at which time he beginneth to have South declinations decreasing towards the vernalited quinox: so that he riseth South-East, and setteth South-West.

The Lord of this Quarter is also & Mars, and partner with him 4 Iupiter: In this Quarter for the most part the Windes will fall out Easterly, North-East, South-East.

by Figures or Scheams erected to every Quarter of the Year, and to each Preventionall, and Postventionall; Change, or full Moon, and accordingly, I find & Mars Almuten or Lord of this yearly revolu-

tion, and & Mercurie partner with him.

Now, as to the matter of Judgement, I shall but superficially hint at some things, according to the exigence of this Annual Synopsis or Abridgement: Therefore one figure being creeked for the O Suns ingressed in V Aries, I find & Mars Lord of the revolution not aspected by h Saturne, or a Planet of a cold nature: But being in V Aries, in a partiall of Conjunction with the O Sun, he moderated the cold in Winter, and encreaseth the heat in Summer the more because in a warme signe, and with a warme Planet: Hence it followeth, that in cold Regions his influence is comfortable, both

53 but, an hotter places, it caufeth of his heat. For & Mars Heat, House-burnings, Moreover observe that

ortends much Raine, if he be well in his own light, it portends much Raine, if he be well to here in an angle and House, but only combust by the O Sain altration and Triplicitie. It postends good successe to them whole alcendent is Y tries | against their Enemies. As concerning & Jupiter, being Lord of the ascendent, with the & Taile of the Dreges in the fecond house, give judgement Astrologer: for the reft I leave to be further treated of by the Astrologers.

Now observe that Anno 1662 December the 2 all the Planets were in one signe so wit ? Sagirtarie, the house of 4 Jupiter: And observe also that there was a notable Conjunction that hapned Anno 1662. at which tune & Saturne was elevated above 4 Jupiter, this Conunction being the foreruner of grievous and terrible mutations and accidents, in these places that are under the figne ? Sagittarie, for if h Saturne be ftronger then 4 Jupiter, it will be very terrible; but If that 4 Jupiter be fronger then h Saturne, somewhat will be abated

Gentle Reader, were it not for putting the PRINTER to soo great paines and charges, for fo small benefite, more might bare been expected ; But this being kindly accopted off my Hand, I shall endeavour ( God-willing ) to give you further judgement , concerning the Fatall-Year One thousand, fix hundreth, fixty and fix.

Thewife it may please you to understand, that the PRINTER is as large and willing, at you can be desirous; to fatisfie you in all poynts Aftrologicall, especially in ferting down to you exactly the Eclipses, with their effetts; and how it may fall out on thefe Regions under the Signe Eclipfed: With the foure quarters of the Year . and with what Planets they are gopermed: As alfo, the exact day, houre and minute of your new-Moon, quarters and full, herving you, on what day of the Week every quarter falleth; and on what day of the Week, every Moneth begineth, with the daily diffosition of the Weather: Whih is indeed a redious buffines, more painful have profitable, yea, and more chargeable then well new arded. As for others, what is they will now be too curious, but content themselves in the Evening sith our marning Orts. And as for the Novelties which you would hasten thicker mis. I referre you to the hinder end of this our Prognostication.

\*\*\*\*

The exact day, houre, and nute of the New-Moon, her h and Quarters; with the dayly difpolition of the Weather: as alfo, the rifing and ferting of the Sun: Exactly fee forth for the YEAR. 166c.

MENTER DESIGNATION OF THE PROPERTY OF THE PROP

A declaration for the butter understanding of these Tables for the Ebbs and Floods following.

Fyou be desirous at any sime to know when it is a full Sea, or high water at any Port or Haves, atheresetland, England, Prance or Ireland; or any other past the World: If first by your own knowledge or to

Mariner ; you know, when of fuch a part of the Firmament, the ables thall be needleffe for you : But if ye cannot f of, and would learne, then refort to this Table : An fielt confider with your felf, how many dayes old th Moon is, the day that you defire to know the Tyde and in the middle of this Table you shall find in th appermoft part thereof, this tittle, The Age of the Mon and eight against the day of the Age of the Moon, yo that finde on both fides, the places and points of the Firmament, as South, South by West, South South Wa &c. And next under that line, are thefe letters, H.an M. which fignifieth Houres and Minutes : Then have ing in memorie the Age of the Moon, as aforefaid go directly to the tirtle of that place of the Firmamen to the which when the Moon cometh, maketh a hig Water, and there you shall finde the exact Houre an Minute when it is full Sea in that place.

### As foz Example,

Where it flowes South by West, as at Aberdene, desire to know at what time it will be full Sea at that place the 10 day of the Moon: I apply my self to the Table, and find the flowing at Aberdene South by West, then looks in the Columne of the Age of the Moon, I find the day of t Moon 10, and right against the same upon the left hand, find 8 houres 45 minuts: at which time in the Evening will be full Sea at that place, but if it be the 25 day of the Moon, ye shall finde the same flowing to be at 8 houres to minute in the morning, and accordingly thorow the Tables

### 

A declaration of such accidents as a likely to fall out this present Year.

Thus having alwise hitberto endeavoured to give you every year some of my best astrologicall Observations, concerning the Year in generall, as my infallible Authors, Copernicus, Verus Pater, and other expert Philosophicall Astronomers enformeth me: Therefore, having taken such paines in peruseing their tedious Volumes, and remarking their approved observations. Why may not I also give a proofe, what happily I have reaped? craving only the readers patience, and charitable censure of the same.

T is therefore affirmed by my infallible Authors, that this Year 1665. We shall have a pleasant Winter, hough cold, a naturall Summer, Fruite sufficient, Harest indifferent, yet some Winde and Raine, therefore e not loyterers you Plough-men: Many Marriages, lenty of Wine and Hony, death of young Men and lattle, Robberies in most places, News of Prelates, fkinges, and cruell Warrs in the end. Therefore see pit, you Hollanders.

ikewise take notice to my short Prognostication as followeth.

Who borrowes Money to buy Land,
Or Gold, to builde Stone-Walls;
Who beggs, that he may make a Feast?
Who drinkes, when Thirst not calls?
Who sits up late to spend his Goods,
And he, who keeps a Whoore;
All these may live till midst of JUNE,
But will not Thrive, I'me Sure.

A Strange

DONE and DEE all him bear; ele of Pyke and Speare first exceed. nat right well in breadth, Cubits and fome more; MAN was feen before And set his Mouth not opened wyde? His Behe found from Hill to Hill, the doth hine on every fide: All learned Men thall have delyte, Por he shalfralke with Tongues ten: tome Newes each day he shall endyte, Bight well marked by learned Men. from IEAMES the fourth he hath his Lyne His Face shall thew his Pedegree : Many Nobles shall him propyne, And many shall come him to fee. A fharn affault from the North part, Unto the Ground fall lay his Glores But George agains by Strength and Art, a Full foon his boner shall restore: cfore the Year of Fury three He shall be found to wear the Crown ell bonored in all degree In Vertue, Honorand Learning. Andchus Peace GOD give us Graces Heaving L.O. R.D. grant us place.
